

GCS is a major manufacturer of reusable aluminum shipping containers of varying sizes and purpose. GCS specializes in general purpose cargo containers, military working dog kennels and purpose driven welded airtight units. The containers can be produced to a government drawing package, customer furnished requirements or custom designed and engineered by GCS.

# CONTAINERS

# JMIC

GCS produces welded airtight aluminum containers to customer drawings and specifications. We can work with you to design, then build your container. Our welded airtight containers follow the design guidelines of the Air Force and Navy packaging technology and incorporate industry standard features.

## WELDED AIRTIGHT

*Features:*

- Humidity indicators
- Desiccant ports
- Locking seals
- Anti-static foam

The Joint Modular Intermodal Container (JMIC) makes material resupply operations and transfers, regardless of equipment, seamless due to JMIC's unique design features.

*"JMIC is the missing link in the defense transportation system."*

The JMIC makes it easier to access contents and its uniform size makes it easier to transport.

With a smaller footprint than traditional 20 foot containers, the JMIC uses a building block approach to stowage. The JMIC is also collapsible, making it ideal for deployment and resupply missions.

Updated 3/2011

## GENERAL PURPOSE

GCS produces a full line of general purpose aluminum containers. All units are 463L pallet compatible.

*Optional Features:*

- Hazmat Inspection Doors
- Electrical Power
- Interior Workbenches
- Interior storage drawers and containers
- Adjustable casters
