GCS Load Out Bag

GCS Load Out Bag features a multi-wheeled design that allows the user to carry or pull the bag depending upon the equipment. The load out bag features a large main compartment for storage of deployment equipment, a "U" shaped zipper closure system, an adjustable length pull handle opposite the wheeled end, grab/carry handles at each end of the bag and several cinch straps to properly secure the equipment load. There are three (3) external zippered pockets on this bag, one (1) large pocket that runs the length of the bag and two (2) smaller pockets on the opposite side. Inside the bag are six (6) different zippered pocket sections as well as internal cinch straps. The wheels base is protected with reinforced skid plates and the bottom of the bag has two plastic runners to provide additional protection for the bottom surface.

Specifications

Materials & Parts meet the following specifications:

Webbing (A-A-55301, MIL-W-17337 Cls 2)

Binding (MIL-PRF-5038)
